SPEAR STUDY GROUP

SPEAR STUDY CLUB

Along with lunch and learns and continuing education courses that are a cultural part of Technic Dental Laboratory we are proud to sponsor SPEAR STUDY GROUP. A case study collaboration with like minded peers in the area offers continued education and collaboration to evolve you and your practice to the highest level of excellence. Directed by Mike Capps, who is not only the owner of Technic Dental Lab but also himself a Certified Dental Technician, Spear offers a wide variety of continued education that directly relates to the needs of the study group members. In a relaxed personal environment continued education is taken to the highest level.

Within the study group there are topic of discussion vital to the ever changing world of dentistry and how we approach it. Clinical case reviews within the group as well as online education to include the entire team. The Spear approach

includes a video support library that can be used by its members to provide office training and support bringing your practice to a level of teamwork and excellence that will be sure to spell success.

Spear Members meet on the third Thursday of the month at Technic Dental Lab in the comfort of our education room. It allows for relationships of trust and support for each member as well as a resource for the member's team.

There is limited membership making this the group of elite. If you are interested in becoming a member of The Technic Dental Lab Spear Study Group or in need of further information please call (708) 479- 1212 . The next session enrollment is starting now! We look forward to having you be a part of our Study Club!

BACK TO BASICS

Just as the patient/ doctor relationship is important, so is the relationship you have with your dental laboratory. The communication and collaboration directly reflect the success of reaching the optimal oral health with the esthetic detail desired today.

Dentistry is complex and the advancements in technology, materials, and cement have enhanced the collaboration of the dentist and the dental technician. The ultimate goal in the relationship is to provide the dental patient with the highest quality results possible. The high standard of care approach on both sides of the relationship between doctor and dental lab equals high esthetics in a quality restorative product to best fit the need of the individuals treatment.

There is a lot that goes into a healthy smile. Open communication is essential. Technic Dental Lab believes in the partnership and support with the dental office . Our technicians are always welcoming to collaboration with the doctor on the basic restorations to the more complex , after all each situation is individual to the patient's oral health.

Technic Dental Lab takes pride in the communication and collaboration with the doctor and team to achieve the best quality results possible for each and every patient. This level of customer service does not stop with a phone conversation. Our team is ready to provide on site assistance as well as educational courses to

aid the entire team. To be a part of the of the dental support we can provide call (708) 479-1212 and see how we can assist your office today!

Digital Impression Systems

DIGITAL DENTISTRY

The field of dentistry is drastically changing as “Digital Dentistry” has made swift changes to the aspect of patient care and the doctor lab relationship. The movement began as simple as digital xray and evolved to digital restoration.

The benefits to this advancement have proven positive results on patient care. The use of intraoral scanners in the dental office enhances the patient experience as there is no longer the need of physical impressions with traditional materials. Reduced chair time, higher case acceptance, and a higher accuracy in results are all benefits contributing to the patient experience provided. The digital age of dentistry has opened new doors to efficiencies as well as advanced resolution in treatment planning.

The doctor laboratory relationship is crucial in the digital age. It is encouraged that there is open dialogue to form continuous success and improving results . The laboratory can receive a digital file within moments and play a drastic role in the design and material choice for optimal results.

Technic Dental Lab is ready to assist you in all aspects of the digital revolution. Our technicians are highly trained and continue to advance as does the world of dentistry. As advancements of software, materials, and design continue the team at Technic Dental Lab stays educated and prepared to be a support system to the

doctor and team. We are excited to partner with and support you as the digital age of dentistry continues to evolve. You can call us at anytime at (708) 479-1212 with any questions regarding digital impressions, material choices, and proper cementation for the highest quality of clinical results.
