Hands-On Program

Date: April 4th, 2013  
Time: 6pm – 9pm  
Fee: $500  
3 CE Credits

Take home a model, retrofit of provisional restoration. Value = $500  
Please RSVP to Julie at 708-479-1212 or email: TechnicDental@sbcglobal.net

- Immediate temporization of the All-On-4™
- Fabrication of different techniques on retrofitting of the immediate denture or current denture
- Fabrication of a provisional bridge: Models, denture, implant parts & materials to fabricate Teeth-In-A-Day™ study model
- Dietary recommendations
- Maintenance protocols
- Preparation for the final impressions

For the All-On-4™, the patient receives an interim implant-supported bridge as the temporary. This is a fixed screw-retained restoration secured immediately following surgery. This temporary will remain attached to the implants until sufficient healing (4-6 months), when the final fixed screw-retained restorations will be fabricated. This technique is also referred to as Teeth-In-A-Day™. This program will show how the temporary is fabricated, either at your office or the surgeon’s office, and the patient leaves with Teeth-In-A-Day™.

Technic Dental Lab will present this course. B. Michael Capps, CDT, Owner, and Anthony A. Waznonis, Jr., General Manager have fabricated hundreds of All-On-4™ or Teeth-In-A-Day™ temporaries in dental offices throughout Chicagoland and Northwest Indiana. Every week one or both of them are at dental surgeons or dental offices to assist in temporizing patients with 4 or more implants.

All-On-4 in 4 Series includes:
- Mar 19, 2013  
  All-On-4™ Concept $99
- April 4, 2013
