Tech Talk

Quarterly Newsletter

By: Declan Duggan

Welcome back to Tech Talk! What's new in Q2?

Events, events, events!!! Long after the mid-winter "Lab Days" have ended, the conversation continues. After having soaked up all that information, what do we plan to do with this knowledge? Well, of course we're putting it to use at the bench, but we're offering it to you as well. In order to do so, we're hosting FREE educational events. Reserve your spot today, these events fill up fast!

"Nexus Nights"-Discover the First AI Powered Complete Digital Full-Arch Workflow.

April 24th 2024 (6-8pm) Registration Begins at 5:30pm
***2 CE Credits - No Cost - Dinner & Refreshments!**

Technic Dental Lab & Keystone Dental Group present topic speakers: Brett Edwards & Kevin Stack. We invite you to join us for an evening of education as we discover the first AI powered complete digital full-arch workflow. Guests attending this FREE event will be issued 2 CE credits upon completing the Full-Arch Rehabilitation Redefined lecture. For more information on the event, please call us or visit Technic Dental Lab on Facebook.

"Anything But the Denture" - Restoring the Failed Dentition with a Fixed Prosthesis Conversion.

May 16th 2024(6-9pm) Registration Begins at 5:30pm
***2 CE Credits - No Cost - Dinner & Refreshments!**

Nobel Biocare and Technic Dental Lab invite you to an evening with **Dr. M. Nader Sharifi**. Dr. Sharifi is a nationally recognized lecturer on the topics of dental implants, full and partial dentures, overall patient care, and restoring root canal-treated teeth. Dr. Sharifi is a select member of the American Dental Association (ADA) National Speakers Bureau. In 2007, he received the coveted Gordon J. Christensen Lecturer Recognition Award for excellence in teaching and loyalty to the profession. Full details on Facebook.

Learning Objectives:

- *Maximizing digital workflow with clarification of necessary analog steps.
- *Understanding the immediate denture records appointment.
- *Partnership needs to successfully provide this treatment in your practice.
- *Material options for the definitive bridge for the All-On-4 concept.

RSVP for Events at Technic

Keeping up with the Tech Curve!

Staying informed and current in the field of dental technology is vital to our success as a company and integral for the treatment of your patients. Where did our educational travels take us and what knowledge did we gain?

Mike and Declan - Align Technology - Raleigh, N.C. iTero "caLABrate" Certification Program

This info-packed, 2-day event, was both hands-on and lecture format. I must say, I have an entirely new respect for first-timers learning to use intra-oral scanners. While they are amazing life & industry changing tools, there's still a learning curve to gaining proficiency with them. Although I'm still not an expert scanner, Mike and I both gained invaluable knowledge of the system (iTero scanner(s)/Exocad software) and its capabilities. We're now much better at navigating through, and finding resolutions to, the "difficult

situations" we sometimes come across with digital scan files. That being said, if your practice desires, we'll set up a workshop/event with our Align/iTero Reps to help you get the answers to any questions you may have concerning: capturing perfect scans and/or using the Exocad software most efficiently. Please, let us know where you or your practice could use a bit of assistance or a quick refresher course, we'll gladly provide it. Just have a quick question or two? Give us a call, we love to help.

Jeff and Zoltan - Asiga - Ann Arbor, MI 3Shape Denture Design Training

This 2-day workshop covered work flows for digital dentures, beginning to end. Setting up orders, importing scans, arch design and production are all moving to digital, and we'll be there as well. Technic is very excited to thrive in digital dentures and we're almost there. We're just applying the finishing touches before we release our digital denture options to your practice. Get excited!

New Service Offered by Technic

You trust us to design, fabricate and repair your dentures. Why not have us clean them too? This new add-on service is only \$39 per arch, with no additional time in lab. When you

send a full or partial denture to Technic, just say "add cleaning service" in the Rx and it's done. Whether it's: plaque, coffee, tea or tar, it's no problem. The solution to your frustration is now available at Technic Dental Lab. We can restore the aesthetics your patients desire and deserve.

We hope to see you all at the lab very soon, but if not, stay tuned for the next edition of Tech Talk in Q3.
