Tech Talk

Quarterly Newsletter

By: Declan Duggan

What's in Store for Q4 - 2024 at Technic?

Just as the leaves begin to fall, we find ourselves in rush-mode again. Rushing to squeeze those last-minute appointments into your schedule, rushing patients' last-minute/holiday cases and rushing to prepare ourselves for the holidays as well. It's the best time of year to look back on all our accomplishments, and to see what still needs to be done. We offered many opportunities for CE at the lab this year. We were happy to host scanner demos, provide multiple speakers covering varied topics and cater to anything else you requested because we make it about the doctor and their patients' needs first and foremost. Feel free to contact us with input on CE topics which interest you most and we'll do our best to host an event focused on your point of interest. Please keep in mind as we approach the holidays, Technic is here for you when the flux of same-day/rush cases start arriving. Give us a call to set-up those same or next-day deliveries as the rush-case schedule amps up this time of year.

Front Desk: 708-479-1212.

More CE Events before the Holidays!

We're not backing down or taking any breaks this year. More, more, and even more events still to come. We finished up Q3 with 2 big events in September (NEXUS NIGHTS & LOCATOR FIXED-brief summaries to follow), and of course Spear Study Club as well. We're jumping right back into it this October and throughout Q4. Along with co-host Nobel Biocare, Technic Dental Lab presents speaker Chirag N. Desai, DMD as he covers all things X-Guide. Dr. Desai's focus will be: Simplifying the digital workflow and showcasing the state-of-the-art real-time navigation system used for implant placement. If you'd like to join us at Technic on Thursday, October 24th for all things X-Guide, please contact Hannah at 773-766-9562 or Hannah.Chesley@EnvistaCo.com to RSVP for this FREE CE event. Sign-in will begin at 5:30pm with presentation from 6-8pm. Food and drinks to be provided by Nobel Biocare, who will also be issuing 2 CE credits upon completion of the program. If the X-Guide system doesn't cater to your specific needs, but CE is still on your mind, consider joining our Spear Study Club which meets on the 3rd Thursday of the month, 10 months/year. We've been hosting this study club at

Technic for over 10 years now and the results have been more than amazing. The collaboration of various specialists present in the room brings such a unique opportunity to network and gain ground breaking knowledge of what new technology & techniques are coming into play, and who's out there implementing them. Please reach out to Technic for more information on upcoming events and the Spear Study Club. Contact information listed at bottom of page.

Nexus Nights 9-12-2024

If you attended the 1st or 2nd run of this event, you know it was a huge hit. If you happened to miss both, our presenters did a fantastic job walking us through the first AI powered complete digital full-arch workflow and explained how this technology allows for up to 60% reduction in treatment time.

Locator Fixed 9-6-2024

Guest speaker David A. Little, DDS presented this in-person course designed for clinicians to enhance their learning and clinical skills for full-arch fixed restorations and to learn additional clinical skills to complement their practices with fixed full-arch restorations. Emphasis was placed on diagnostic skills, fundamentals, and step-by-step protocols to streamline full-arch fixed restoration fabrication and delivery using LOCATOR FIXED.

***Technic to be CLOSED on the Following Dates for the Holidays.

November 28th & 29th Thursday & Friday
December 25th - Wednesday
January 1st - Wednesday

As Always, Thanks for Choosing Technic! Happy Holidays!!! See You in Q1-2025!
